QADIR SALMAN

Senior Full-Stack Software Engineer

Mobile: +92 310-2010954 **Email:** qadirsalman019@gmail.com

Professional Summary

Senior Full-Stack Software Engineer with 6+ years of experience architecting, developing, and owning production-grade web applications across eCommerce, SaaS, ERP, and multi-tenant platforms. Strong specialization in backend architecture, API design, payment systems, and system scalability using Laravel, PHP, Node.js, React, and Next.js. Proven ability to work autonomously, make technical decisions, and deliver secure, scalable systems that directly support business operations and revenue generation.

Core Focus

Full-Stack Architecture | Frontend & Backend Systems | API Design | Payment Integrations | Scalable User-Facing Applications | Business-Critical Platforms

Technical Skills

- ✓ **Frontend**: HTML5, CSS3, Bootstrap, Tailwind CSS, JavaScript (ES6+), React.js, Next.js
- ✓ **Backend**: PHP, Laravel, CodeIgniter, Node.js, Express.js
- ✓ **Databases:** MySQL, MSSQL, MongoDB, PostgreSQL
- ✓ **DevOps & Tools:** Git, GitHub/GitLab, CI/CD Pipelines, CRON Jobs, Server Management
- ✓ **Payments & Integrations:** Stripe, PayPal, Clover, Authorize.Net, Square, Firebase Cloud Messaging, Pusher, Twilio, SMS Global, Google Maps & Geolocation APIs, GoDaddy APIs, ShipStation (UPS/USPS)

Professional Experience

Softnox Technologies – Senior Full Stack Developer **(March 2023 – Present)**

- Architected, developed, and owned multiple multi-tenant web applications using Laravel, Node.js, React, Next.js, and Tailwind CSS across healthcare, caregiving, travel, and eCommerce domains.
- Defined and implemented REST API architectures with an emphasis on long-term maintainability, performance, and clear service boundaries across production systems.
- Led and implemented complex payment system integrations including Stripe, PayPal, Clover, Authorize.Net, and Square, supporting revenue-generating workflows across multiple platforms.

- Designed and built an internal domain management system integrating GoDaddy APIs to automate domain discovery, renewals, and client notifications, reducing manual oversight and operational risk through scheduled background jobs.
- Established access control and structured logging across multi-user production systems to ensure secure operations, traceability, and reliable auditing in live environments.
- Took ownership of existing codebases, refactored critical components, and improved overall system structure to support scalability and long-term growth.
- Mentored junior engineers through code reviews and architectural guidance, helping establish consistent coding standards and improving overall code quality.
- Collaborated directly with stakeholders to translate business requirements into scalable technical solutions.
- Made architectural and technology decisions by evaluating trade-offs between performance, scalability, delivery speed, and long-term maintainability.

Digi Trestle - Associate Backend Developer **(June 2021 – Feb 2023)**

- Built and maintained multiple production eCommerce platforms using Laravel and PHP.
- Contributed to ERP systems and operational workflows using Laravel Lumen.
- Supported and optimized 20+ live stores, handling performance issues and enhancements.
- Collaborated with senior engineers on backend architecture and API design.

Key Projects

Multi-Tenant Web Portals

- Implemented role-based authentication, multi-user access control, and secure admin dashboards.
- Developed reporting systems, automated backups, and AJAX workflows for efficiency.

Custom eCommerce Platforms

- Built RESTful services using Laravel Lumen with JWT authentication.
- Integrated multiple payment gateways, shipping APIs, and logistics providers.
- Optimized checkout flows and admin panels for stability, performance, and scalability.

ERP & Internal Systems

- Developed Quality Control workflows for manufacturing operations.
- Automated domain lifecycle management and client notifications using scheduled background jobs.

Engineering Approach & Responsibility

Owned systems end-to-end from requirement gathering to production deployment and maintenance. Regularly handled production issues, refactoring, and performance bottlenecks while balancing scalability, security, and business needs. Known for writing clean, maintainable code and taking full responsibility for production systems.

Key Achievements

- Delivered and maintained business-critical platforms actively used by real clients.
- Reduced manual operations through automation and API-driven workflows.
- Improved backend performance and system reliability through query optimization and clean architecture.
- Consistently trusted with ownership of complex systems and integrations with minimal supervision.

Academic Qualification

- Bachelor of Science in Computer Science (BSCS) — Virtual University of Pakistan (***2024-2028)***
- Advance Diploma in Software Engineering (ADSE) — Aptech Pakistan. (***2019-2022)***
- Certified Diploma in Graphic Designing — Eureka Multimedia. (***2018-2019)***
- Intermediate in Science (Pre-Engineering) — Askari Degree College. (***2016-2019)***
- Matriculation in Computer Science — Al-Badr Secondary School. (***2014-2016)***
